Plant Challenge

The 4 Ds

A few simple steps that
STEM superstars use
to solve problems in a
creative way.

Tip: It's ok to go backwards and
forwards between the steps to
find the best solution.

Step 1: Discover

I wonder what
the problem is?

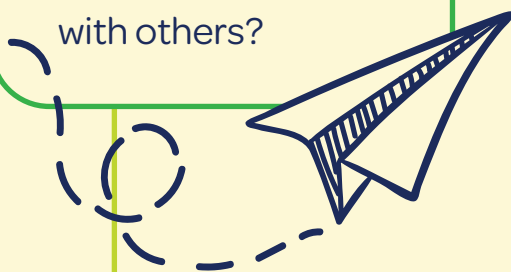

Step 2: Design

I wonder what
the solution is?

Step 4: Deliver

I wonder how we can
share our solution
with others?

Step 3: Develop

I wonder how to bring
the solution to life?
