

Wonder Project

# Water Challenge

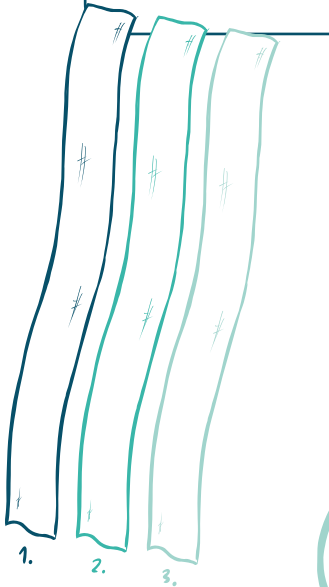

## Activity 1.3: Braided river

**Create a braided river to showcase the connection between tāngata, whenua and wai.**

When the mauri of wai is protected, so is the whenua, and so are the tāngata. Get crafty and create some artwork for the classroom to display this connection.

### Step 1

In your rōpū, collect three different colours of crepe paper. Each colour represents one of the three river elements – tāngata, whenua and wai.

### Step 2

Shape the crepe paper into a braid. Twist the ends of your crepe paper together on either side of your braid.

### Step 3

Connect your braid with other rōpū to create a river display wall.

### Step 4

Use your knowledge on the Mauri Compass to add drawings around your river that are signs of strong mauri.

This could be native birds or trees, or a green landscape.

**Mahi tika ana!**
