

Forms of energy

Energy comes in a bunch of different forms. Check it out!

Elastic potential

Energy that is stored in something elastic when it's stretched or compressed.

Kinetic energy

The energy of motion.

Gravitational potential

Energy that is stored because of an object's height above the Earth.

Light

Energy that helps us to see the things around us.

Sound

Energy that we can hear.

Thermal

Energy that's responsible for something's temperature.

Electrical

Energy that helps us power our haponi.
